Anti-Badiou and Philosophy for Non-Philosophers – how Sirohi is then in Philosophy but also means non-philosophy – a set of practices

By Emmanuel Francois Laurelle

I. Reading, Writing and

Reflecting – on Badiou

Badiou deems this to be philosophy, that we are achieving truth and a scientific truth in in fact only mathematics.

II. Anti-Badiou – Sirohi as appreciating non-philosophy and non-philosopher practices

In fact a set of non-philosophical practices, like reading a letter

and smoking
which becomes
truth if it is written
in a small game
playing and joke
on the signature.

Such things are
infinite in Sirohi –
against Badiou.
